JavaScript Developer (Junior / Mid – Project-Based | REMOTE)

Description

SEE is looking for a Junior or Mid-level JavaScript Developer to **support web applications and interactive features**. This is a **project-based role**, with assignments varying according to project needs.

Responsibilities

- Develop frontend functionality using JavaScript (ES6+)
- Integrate APIs and work with existing codebases
- Debug, optimize, and maintain code
- Deliver clean, maintainable, and production-ready solutions

REQUIREMENTS

- Solid understanding of JavaScript fundamentals
- Experience with frontend development frameworks or libraries
- Ability to work independently and adapt to different projects
- Portfolio or GitHub repository showcasing previous work preferred
